

MATTHEW BROWN

SOFTWARE ENGINEERING INTERN | H-E-B DIGITAL

Houston, TX | matthew.brown.us@outlook.com

PROFILE

H-E-B Seafood Partner and Computer Science student combining firsthand retail operations experience with Java, JavaScript, SQL/MariaDB, and academic software-design projects focused on inventory and customer workflows.

EDUCATION

Capella University | B.S. Computer Science

Expected 2027

Relevant coursework: Java Programming; Database Systems; Networking; Software Architecture & UX Design

TECHNICAL SKILLS

Languages: Java, JavaScript, SQL; HTML/CSS

Development: Java OOP, arrays, ArrayList, input validation, exception handling, debugging, testing

Data & Tools: MariaDB, DBeaver, Visual Studio Code, relational design, JOINS, subqueries

SELECTED TECHNICAL PROJECTS

Seafood Item Console Application | Java

Built a Java console app that stores three seafood items in an array, validates prices and weights, handles invalid input, and calculates item totals by weight.

Volunteer Relational Database | SQL, MariaDB, DBeaver

Designed related tables with primary/foreign keys and constraints; wrote JOINS, nested subqueries, aggregates, SQL functions, inserts, and backup procedures.

Retail Inventory Software Design | Academic case study

Designed requirements, use cases, an ERD, UI screens, an Agile project plan, and verification tests for a proposed H-E-B inventory system; academic work, not a deployed H-E-B product.

Web Development Portfolio | HTML, CSS, JavaScript

Built a three-page portfolio with semantic HTML, an external stylesheet, forms and multimedia, and JavaScript for date output and console scripting; earned a WGU Excellence Award.

EXPERIENCE

H-E-B | Seafood Partner

2026–Present

- Monitor product availability, replenish displays, maintain seafood quality and food-safety standards, and respond to changing customer needs.
- Collaborate with Partners on product rotation, sanitation, merchandising, and daily operational priorities.

H-E-B | Cross-Functional Team Partner

2025–2026

- Supported produce, dairy, frozen, grocery, and fresh departments; adapted quickly to different teams, workflows, and priorities.

Target | Fulfillment Associate

2023–2025

- Used handheld technology to pick, stage, audit, and fulfill customer orders, including substitutions and special requests.

AWARDS & RECOGNITION

WGU Web Development Foundations Excellence Award (Apr 2026) | 2026 Spirit of H-E-B Award Nominee | 2026 Customer Service Award Nominee
